 Founder: Jeffrey J. Ellis, PT, MS, MTC, FFCMT
 Orthopaedic Manual Therapy Seminars
Muscle Energy & Diagnostic

2007 COURSE CALENDAR

CTI: Cervical Thoracic Integration & LPI: Lumbo-Pelvic Integration (3.75 hrs / 30 CEUs / \$625)

CTI:		LPI:	
April 12-15	Bayshore, NY	April 29-30 and May 1-2	Bay Shore, NY
April 19-22	Wellsboro, PA	May 3-6	Atlanta GA
April 19-22	Milwaukee, WI	May 3-6	Chico CA
June 7-10	Berkeley, CA	Oct 11-14	Milwaukee WI
June 7-10	Baltimore, MD	Oct 18-21	Bayshore NY
June 14-17	Cortlandt Mnr, NY	June 7-10	New York NY
Sept 13-16	La Jolla, CA	Nov 15-18	Abilene, TX
Oct 18-21	Atlanta, CA	Sept 13-16	Boynton FL
		Dec 6-9	Cortlandt Mnr NY
		Sept 13-16	Baltimore, MD

These courses offer an integrated approach in the evaluation and management of somatic dysfunction of the C-T spines and costal cage, lumbo-pelvic and LQ regions, primarily utilizing Osteopathic methodology and a strong emphasis placed on anatomy, arthro/myokinematics and pathomechanics. Through extensive lab experience, identification of specific positional dysfunctions and motion restrictions will be stressed. Treatment will be eclectic in nature and based on objective findings enumerated in the evaluation. Traditional muscle energy technique as well as non-traditional MET with various alternative positions/treatment strategies and the importance of integrating joint manipulation, STM and NMR techniques with specific strategies for prescribing a HEP will be presented. Core curriculum for IPA's CFMT certification.

IMD: Introduction to Motion Diagnostics (3 days / 24 CEU's / \$495)
 Sept 14-16 Chicago, IL Oct 6-8 Long Island, NY

IMD provides an extensive framework for understanding the anatomy, mechanics and pathomechanics, and basis for the use of various Integrative Motion Tests (Osteopathic/Orthopaedic Manual Therapy including active, passive, passive intervertebral (PIVMT), passive accessory (PAIVMT) and physiologic enhanced motion tests (PEMT) of the Cranio-Cervical, Thoracic, Lumbar Spine, Costal Cage and Pelvic Girdle.

IPEX: Integrative Prescriptive Exercise (3 days / 24 CEU's / \$495)

March 23-25 Appleton, WI June 22-24 Thousand Oaks, CA
 May 18-20 Palm Beach, FL Nov 30-Dec 2 Baltimore, MD

IPEX provides an algorithmic approach to identifying and prescribing prescriptive exercise strategies for the patient with somatic dysfunction of the cranio-cervical, thoraco-lumbar spines, costal cage and pelvic girdle through a review of normal and pathomechanics, and extensive, "hands-on", supervised laboratory experience.

Practical Trigger Point Self Care

The Original Backnobber II includes a 35 page User Guide

- Reduce Pain
- Improve range of motion
- Restore Function

"I wanted to let you know how valuable your product, The Original Backnobber II, has been in my clinic. It has allowed our patients to become more involved in their recovery process and has improved their ability to self manage their symptoms after rehabilitation. Some of our patients even own two — they keep one at work and one at home!"

— Kelly Grim Caras, PT, Facility Director, Keystone Rehabilitation Systems

At The Pressure Positive Company we provide practical and quality self care massage tools that work for you in your clinic and for your patients at home.

TOOLS FOR FITNESS • KNOWLEDGE FOR HEALTH

The **UE Ranger™** is a unique motion assistance device designed to progressively increase range-of-motion and complement the natural movement patterns of the upper extremity. The UE Ranger is ideal for: passive & progressive active assisted ROM, axial loading with distal support, closed & open chain activity in all planes, functional neuromuscular retraining.

Ideal for all hand sizes and arm lengths, the UE Ranger features a molded bilateral hand support and strap, telescoping tube, detachable base and articulating joints. Includes a 16-page illustrated application manual.

The Lumbar Spine with Olaf Evjenth

Returning to Folsom for the 22nd year.

May 17 - 20, 2007
 \$650.00

Sponsored by

Michael J. Moore Seminars
 115 Natoma Street
 Folsom CA 95630

For more information:

Features:

- ▶ Differential diagnostic testing for hip vs. S. I. vs. lumbar pathology
- ▶ Segmental specific symptom localization techniques for the lumbar spine
- ▶ Adverse neural tension testing
- ▶ Soft tissue assessment and treatment
- ▶ Specific segmental mobilization
- ▶ Specific hip flexor stretching techniques safe to the lumbar spine
- ▶ Stabilization training for lumbar hyper mobility

This course is for registered physical therapists only.

PTPillows.com™

Presents:
Pillow Talk

Since the 2006 APTA Combined Sections and Private Practice Section Meetings, the PT community has shown substantial interest in the Natural Comfort Pillow (NCP). Demand for the NCP has been high with clinicians using them on their Rx tables as well as recommending them directly to their patients.

After speaking with clinic owners & PT's, we have developed a new pricing structure to make buying the NCP even more cost effective and a real value-adding product for your clinics.

The Natural Comfort Pillow (NCP) was designed in conjunction with the University of South Australia Physiotherapy Department specifically for the needs of neck patients. It has a unique bolster system of breathable 100% feathers and down, which conforms to the neck with minimal recoil.
